

ABRAHAM BARAJAS

Austin, TX · GitHub: github.com/AbrahamBarajas13 · LinkedIn: linkedin.com/in/abraham-barajas-6935b3165

SUMMARY

Software engineer with 3+ years of experience building and integrating production applications, including RESTful API design, third-party system integrations, and relational and NoSQL data modeling. Skilled at configuring application workflows, mapping data between systems, and troubleshooting integration issues end-to-end. Experienced working directly with stakeholders to translate operational requirements into reliable, maintainable solutions.

TECHNICAL SKILLS

- System Integrations & APIs: RESTful API design and consumption, API authentication, third-party system integrations, JSON/XML data formats, MQTT, BLE device integration
- Data Mapping & Configuration: Schema design, data mapping between systems, workflow/permissions configuration, troubleshooting integration failures
- Databases: MongoDB, PostgreSQL, SQLite, SQL
- Languages: TypeScript, JavaScript (ES2022+), Python
- Platforms & Tools: Node.js, React Native, Angular, React, Git/GitHub, Jira, Agile/Scrum, CI/CD, iOS/Android, embedded IoT

PROFESSIONAL EXPERIENCE

Software Engineer | AppSoluteLogic · Remote 2022 – Present

- Designed and built RESTful APIs and backend services in Node.js/TypeScript, enabling reliable bidirectional integration between mobile clients and IoT hardware via MQTT.
- Configured and maintained system permissions, data models, and workflow logic in MongoDB to support real-time device state, user configuration, and event logging across thousands of daily interactions.
- Mapped and validated data exchanged between mobile, backend, and hardware systems, resolving integration and protocol issues to reduce device-pairing failures by 30%.
- Owned full feature lifecycle — requirements, configuration, implementation, QA, and release — working directly with stakeholders on operational requirements.
- Troubleshoot cross-platform integration issues across iOS and Android prior to release, cutting post-release bug reports significantly.

Software Developer | Guinn Partners · Austin, TX 2021 – 2022

- Built API integrations connecting frontend interfaces to backend data services, improving data accuracy and system performance.
- Collaborated with stakeholders to configure and refine application functionality on short release cycles.
- Participated in Agile ceremonies, sprint planning, and retrospectives to maintain predictable delivery.

KEY PROJECTS

REST API & Data Integration Layer — Node.js · TypeScript · MongoDB 2022 – Present

- Designed and built a RESTful API service consumed by mobile and web clients, with schema-validated data models, role-based access configuration, and structured data mapping between systems.

BLE IoT Integration Platform — React Native · TypeScript · MQTT 2022 – Present

- Built an event-driven MQTT integration layer connecting mobile applications to BLE-enabled hardware, handling authentication, data translation, and real-time sync with sub-200ms round trips.

EDUCATION & CERTIFICATIONS

- A.A.S. in Biology — Laredo College, Laredo, TX
- Full-Stack Developer Coding Certificate — UT Austin Center for Professional Education, Sep 2022
- Cybersecurity Certificate — Chegg Skills (Thinkful), Feb 2026
