

ABRAHAM BARAJAS

(956) 775-6812 · abraham_barajas13@hotmail.com · github.com/AbrahamBarajas13 · abrahambarajas.com

TECHNICAL SKILLS

- System Integrations & APIs: RESTful API design/consumption, authentication, JSON/XML, MQTT, BLE
- Data Mapping & Configuration: Schema design, cross-system data mapping, workflow/permissions config
- Databases: MongoDB, PostgreSQL, SQLite, SQL
- Languages: TypeScript, JavaScript (ES2022+), Python
- Platforms & Tools: Node.js, React Native, Angular, React, Git/GitHub, Jira, Agile/Scrum, CI/CD, iOS/Android
- AI-Assisted Development: GitHub Copilot, Claude (Anthropic)

PROFESSIONAL EXPERIENCE

Software Engineer | AppSoluteLogic · Remote

2022 – Present

- Built RESTful APIs in Node.js/TypeScript for bidirectional mobile-to-IoT integration over MQTT.
- Configured MongoDB data models and workflow logic for real-time device state and event logging.
- Mapped and validated cross-system data flows, cutting device-pairing failures by 30%.
- Owned full feature lifecycle from requirements through release, working directly with stakeholders.
- Used Claude (Anthropic) to accelerate backend development and debugging while owning code quality.
- Cut post-release bug reports by troubleshooting iOS/Android integration issues pre-release.

Software Developer | Guinn Partners · Austin, TX

2021 – 2022

- Built API integrations linking frontend interfaces to backend data services, improving data accuracy.
- Configured and refined application functionality with stakeholders on short release cycles.
- Used GitHub Copilot in the IDE to speed up frontend and API development.
- Participated in Agile ceremonies — sprint planning and retrospectives — for predictable delivery.

SELECTED PROJECTS

- **Eureka WP — Water Probe App** — BLE layer for water-quality instruments: pairing, auth, live sensor sync.
- **WIGL App** — Rebuilt calendar/scheduling and light-settings features; reworked app-wide styling.
- **Bambu Plant — 3D Printer Fleet Dashboard** — Live job status, filament, and error codes for a 10+ printer fleet.
- **Gel Blaster Analytics Dashboard** — Gameplay analytics from platform APIs with filterable per-day drill-down.
- **AtomAI — Tamper-Evident Photo Verification** — Fingerprinted camera captures to make any alteration detectable.
- **Library of Congress Web Scraper** — Pulled archive images and metadata by control number into structured JSON.
- **D&D Resource Tracker** — Real-time tracking of HP, spell slots, and consumables shared across a party.

EDUCATION & CERTIFICATIONS

- Full-Stack Developer Coding Certificate — UT Austin Center for Professional Education, Sep 2022
- Cybersecurity Certificate — Chegg Skills (Thinkful), Feb 2026
